

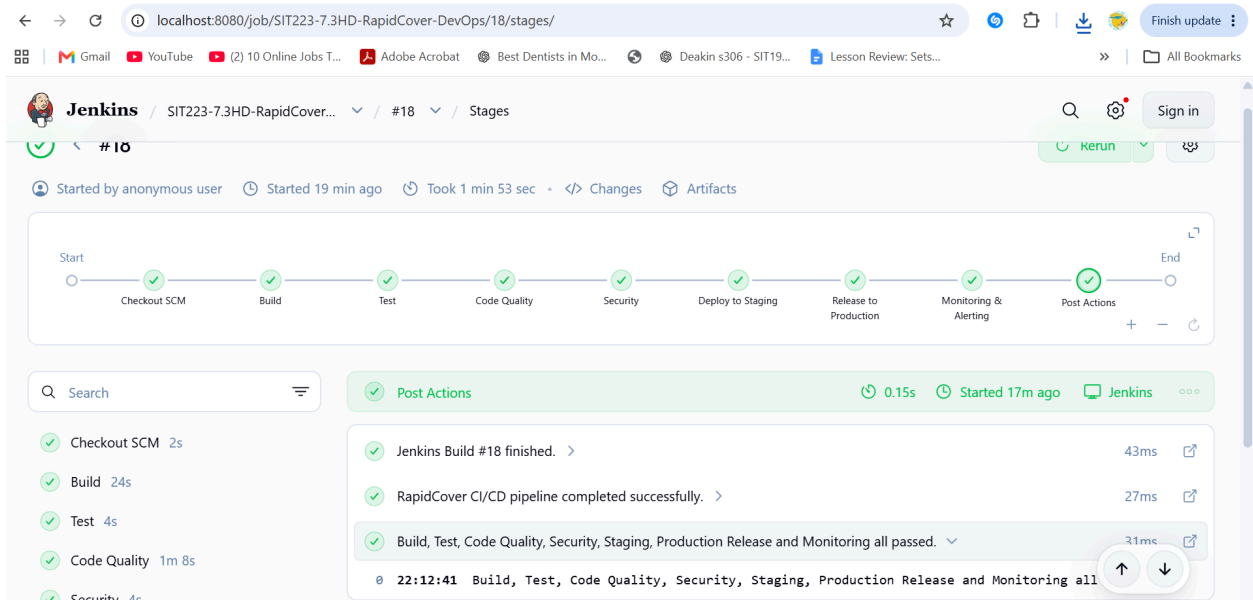

Figure 1: Jenkins Build #18 successfully completing the full RapidCover CI/CD pipeline from build and testing through security, staging, production release and monitoring.

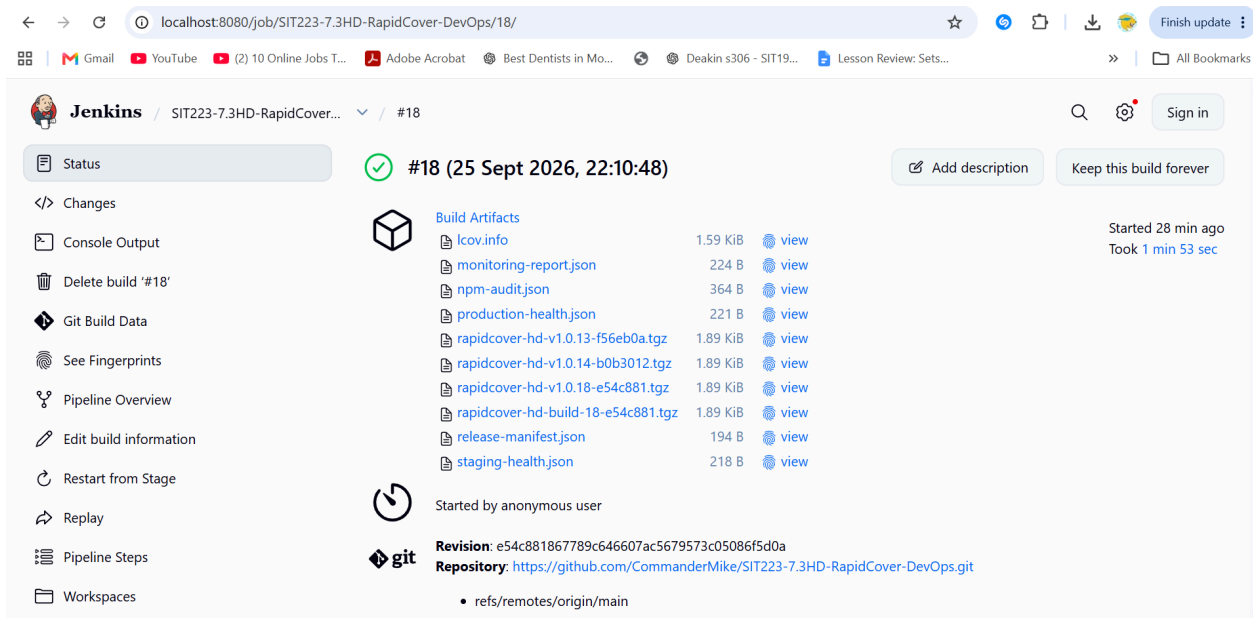

Figure 2: Build #18 archived artifacts, including test coverage, security audit, staging and production health checks, release manifest and monitoring report.

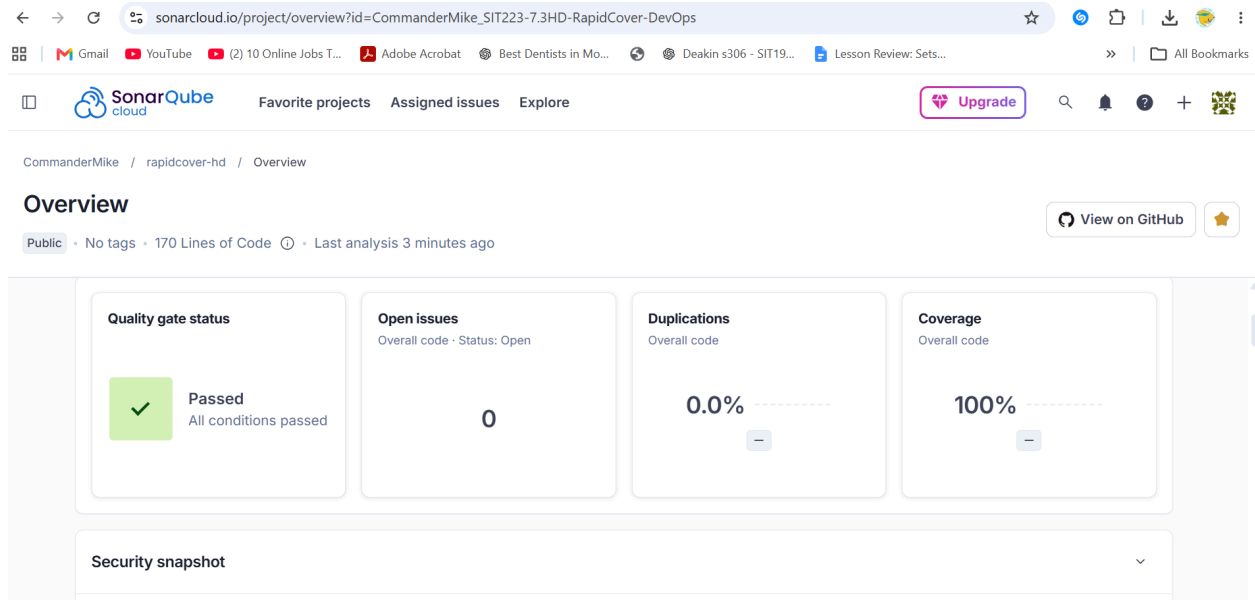

Figure 3: SonarQube Cloud quality gate passing with 100% coverage, zero open issues and zero duplication.

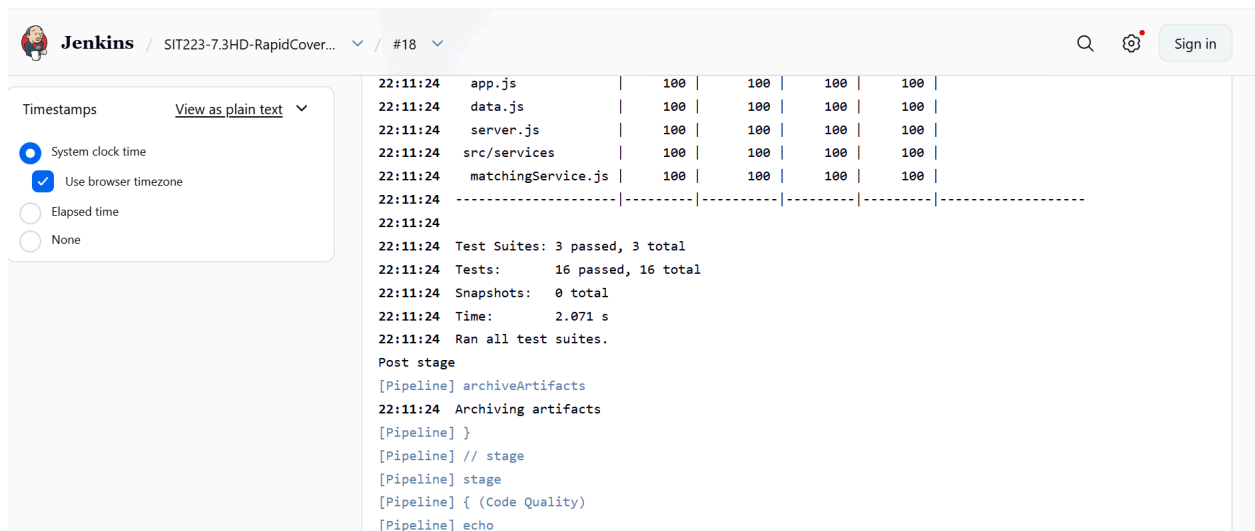

Figure 4: Jenkins test results showing all 3 test suites and 16 tests passing with 100% code coverage.

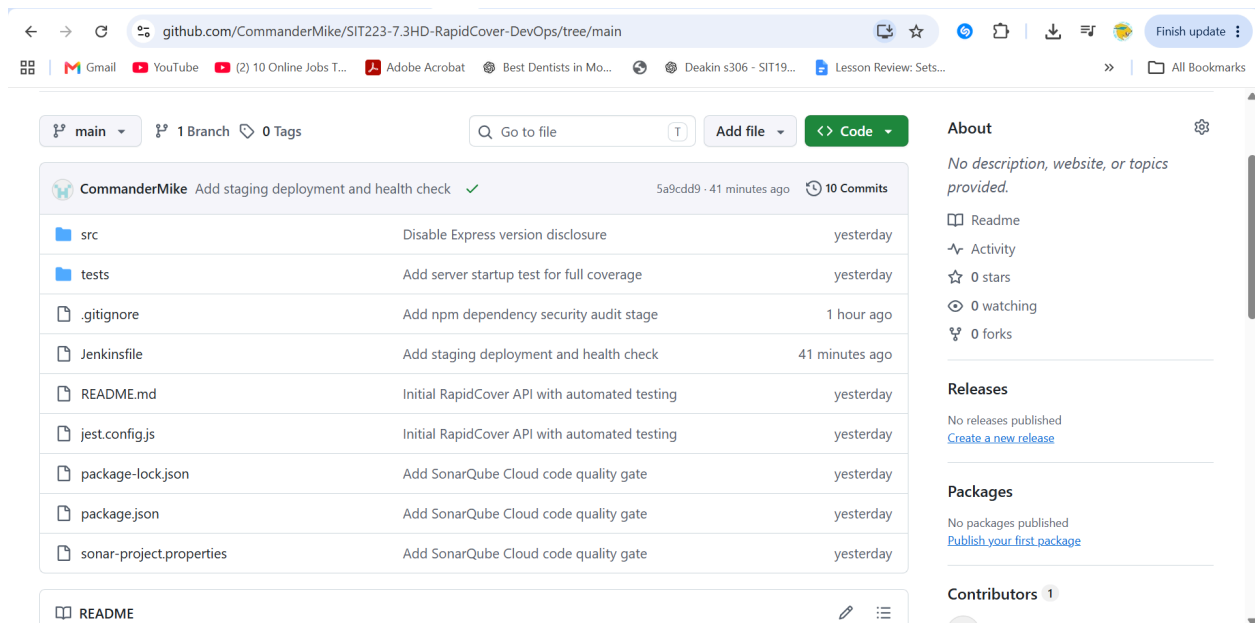

Figure 5: Final RapidCover GitHub repository containing the Jenkins pipeline and supporting project files.

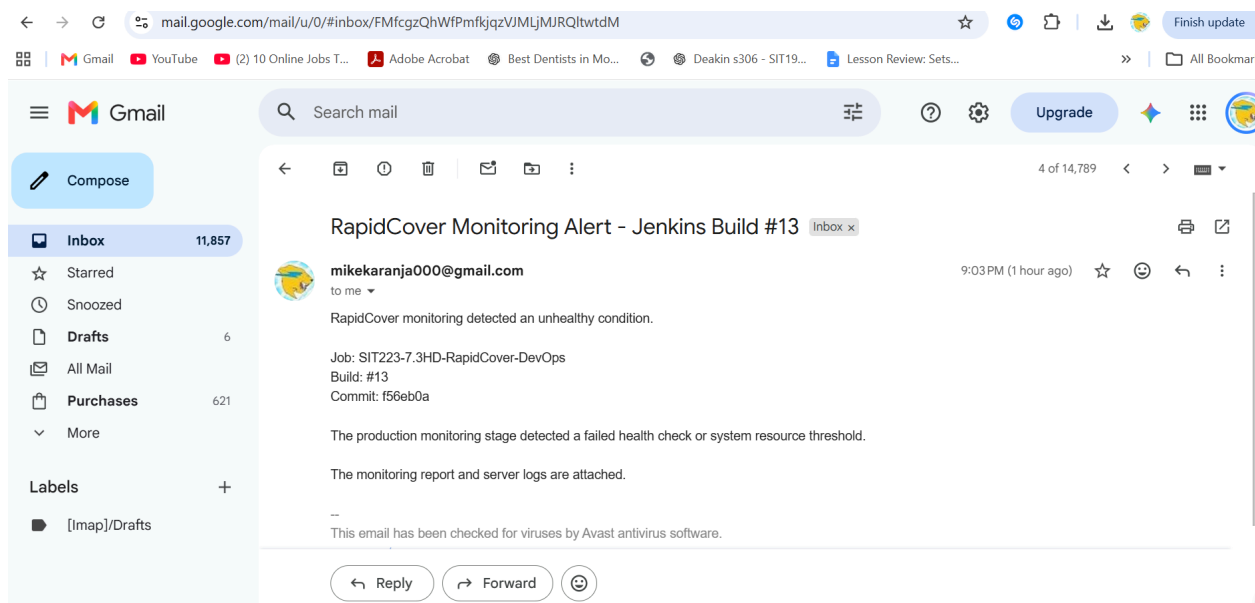

Figure 6: Automated monitoring alert generated during Build #13 when an unhealthy condition was detected, demonstrating the pipeline's failure-alert path.
